## EXPERIENCE

### Backend Web development intern

Daphnis Labs, Gurugram, Haryana

May 2022 - July 2022

- Helped create and optimise APIs for our product "z08 heatmap" which can be viewed through the shopify store.
- Implemented User authentication and created APIs to enable email verification.
- Helped migrate the backend codebase to another framework.
- Collaborated with the frontend team to integrate APIs
- Implemented REST APIs for firebase's cloud firestore to change user data.

## SKILLS

Programming  
Languages  
Softwares  
Frameworks  
and libraries  
Familiar  
with

Core Java, Vanilla Javascript, Python, C  
MongoDB, MySQL RDBMS, FIGMA, Git  
Node js, Express js, Mongoose  
Android development with java, React

## PROJECTS

### Chat Room (Web) MongoDB, Node js, express js, Socket.io

<https://groupchatrooms.netlify.app>

Used socket.io to implement real time communication between clients. Used express and node js for the backend and html, css, js and socket.io scripts for the client. side. Deployed the frontend on netlify and backend on heroku.

### WebJourn Node js and Express js, React js

A MERN website where users can add their public or private journals

### PDF reading audiobook application Python - pyttsx3 and tkinter

Created a python application to read pdfs using python's pyttsx3 and tkinter libraries. The user can choose between a male and female voice. Additional pdf operations were included as features.

### ConsoleJam Node js, Express js, MongoDB, Vanilla Javascript, HTML, CSS

A fullstack application where the user can play multiple games such as Aimlab gridshot, tracking test, rock paper scissor, tic tac toe etc.
